---

Best sir or madam,

I am working with the DHS data from Guatemala 2014-15, and I have come across an issue with that a large amount of the data on BMI is missing for women of reproductive age. I would like to know the background to why this data is missing to such large extent, and I haven't been able to find the information in the DHS Report.

I would kindly like to ask for some information regarding this or get an direction to where in the Guatemala DSH report I can find information about this.

I highly appreciate any help I can get in the matter.

Kind regards,

Freja Wikström
