Hello,

I am using the PR recode of the Malawi 105-16 DHS to look at bed net type and usage.

Variable HML7 (brand of net): is this variable referring to the llin that the individual slept under (HML20) or the brand of the net found in the household (HV227)?

Variable HML4 (months ago net obtained): is this variable referring to the llin that the individual slept under (HML20) or the brand of the net found in the household (HV227)?

Thanks for the help,
Hillary
