Subject: Link IPV mothers with child outcomes in IR file Posted by smd80 on Mon, 15 Jun 2020 16:29:20 GMT

Dear all,

I am examining maternal exposure to IPV with child outcome variables and need to match mothers with children in the Uganda DHS 2016. Is it possible to do this using only the IR file? If yes, is there an ID linking mothers to children?

Many thanks for your help,

JSD
