Hello,

I am trying to calculate the timing and provider for first postnatal check for Mother and new born using ZDHS 2007 womens data (ZMIR51FL) using Stata. I have made reference to the code provided by Lindsay Mallick attached but cant reproduce the figures in Table 9.8 and 9.9 (Attached) of the Zambia DHS report. The DHS 2007 womens data (ZMIR51FL) includes m51a_1 and not m51_1 but does not have m50_1 and m52_1. It also includes m63_1 but does not have m67_1 making either code provided tricky to use.

Please help.

Thanks,

Following is a response from DHS Research & Data Analysis Director, Tom Pullum:

Please try the program for Chapter 9 indicators on our github site (https://github.com/DHSProgram/DHS-Indicators-Stata/tree/mast er/Chap09_RH). Let us know if the general code does not work for this Uganda survey.

Thanks for the feedback. I will try it and provide feedback.

Thank you
