Following is a response from DHS Research & Data Analysis Director, Tom Pullum:

The children born in the past five years, whether or not still living, are in the KR file. For Niger, this will be a file whose name begins with the letters "NIKR". If you have access to the other Niger files, such as the IR and PR, you will have access to this one.

Nigeria DHS 2018:

Stata file is NGKR7ADT.ZIP
SPSS file is NGKR7ASV.ZIP
