Dear All,

I would like to know how do we recode (STATA) the skilled birth attendant in Cambodia DHS 2014? Any recommended DO- file? I would like to group it into skilled birth attendant and attended by other personnel? I found no clue to group it as a woman can answer more than one category of delivery provider.

Thank so much. Urgent response is much appreciated :)

Following is a response from DHS Senior Analysis & Research Manager, Shireen Assaf:

You would need to use the BR or KR file as this indicator is reported among births and not among women. Please see Table 13.6 of the Cambodia 2014 Final report, page 144. You also need to consult this table to know what is considered a skilled provider as this is country specific. The variables you need to explore are m3* . The code below should provide you with the indicator you are searching for (rh_del_pvskill). This code is copied from the DHS Github site for this chapter (https://github.com/DHSProgram/DHS-Indicators-Stata/tree/master/Chap09_RH) and was adjusted for the country specific requirements. The do file you need to check is RH_DEL.do. The DHS GitHub site will contain code for all DHS indicators listed in the Guide to DHS Statistics, please feel free to explore and share (<https://github.com/DHSProgram>).

Stata code:

*use BR or KR file

gen period = 60

gen age = v008 - b3

*Note: Assistance during delivery and skilled provider indicators are both country specific indicators.

**The table for these indicators in the final report would need to be checked to confirm the code below.

```
gen rh_del_pv = 0 if m3a != .
replace rh_del_pv = 7 if m3n == 1
replace rh_del_pv = 6 if m3h == 1 | m3k == 1
replace rh_del_pv = 5 if m3f == 1
replace rh_del_pv = 4 if m3g == 1
replace rh_del_pv = 3 if m3d == 1 | m3e == 1 | m3f == 1
replace rh_del_pv = 2 if m3b == 1 | m3c == 1
replace rh_del_pv = 1 if m3a == 1
```

```
replace rh_del_pv      = 9      if m3a == 8 | m3a == 9
replace rh_del_pv      = .      if age>=period
```

```
label define pv          ///
1 "Doctor"                ///
2 "Nurse/midwife"         ///
3 "Country specific health professional" ///
4 "Traditional birth attendant" ///
5 "Other health worker"   ///
6 "Relative/other"        ///
7 "No one"                ///
9 "Don't know/missing"
label val rh_del_pv pv
label var rh_del_pv "Person providing assistance during delivery"
```

//Skilled provider during delivery

** Note: Please check the final report for this indicator to determine what provider is considered skilled.

```
recode rh_del_pv (1/2 = 1 "Skilled provider") (3/6 = 2 "Unskilled provider") (7 = 3 "No
one") (9=4 "Don't know/missing"), gen(rh_del_pvskill)
replace rh_del_pvskill = . if age>=period
label var rh_del_pvskill "Skilled assistance during delivery"
```

```
ta rh_del_pvskill [iw=v005/1000000]
```
