Subject: Bangladesh HDS 2014 and GPS 2014

Hello,

I am working with Bangladesh 2014 HDS and GPS data.
The shape file 2014(BDGE71FLSR) attribute table says "2017" although .csv file is "2014".
I thought the HDS data "BDKR72FL" and "BDGE71FLSR" are same period although they have different numbers.
I am confused, is this 2014? or 2017?
I would like to examine the data which has both HDS and GPS, I would be happy if I could know the exact year the data was from.

Thank you,
michiko

Dear DHS users forum,

I am sending another message again because I think I wrote unclear and also I miss-spelled. (not HDS, but DHS, I am sorry)

I need the GPS data which was collected in the same period of DHS in 2014, Bangladesh.
I got permission to download both DHS and GPS data. For 2014, there is only one data set of DHS and GPS, BDKR72FC, and BDGE71FLSR, respectively.
I would like to know whether these data were collected in the same period, 2014.

I would really appreciate if somebody help me really quick.

Thank you,
michiko

Dear DHS program user forum,

I am working with Bangladesh DHS and GPS data, and I am wondering that the GPS data of DHS2014 seems GPS of SPA2014, not DHS.
I opened the other .shp files to find GPS data of DHS2014, but so far I couldn't find it anyfile.
I would like to know how I get the data.

I really would appreciate your help.

Best regards,
michiko
