Hi

I am asking about how to calculate the gross attendance basis school

The Questionnaire Contains the questions of

Age

Are you attendance school

What class or level

For each individual

Hello Amel,

For gross attendance ratio please read the Guide to DHS Statistics to understand how this indicator is calculated in DHS [https://www.dhsprogram.com/Data/Guide-to-DHS-Statistics/index.htm#t=School\\_Attendance\\_Ratios.htm](https://www.dhsprogram.com/Data/Guide-to-DHS-Statistics/index.htm#t=School_Attendance_Ratios.htm)

The code for this indicator and other school attendance ratios can be found on our code library on GitHub for Chapter 2 in the Stata do file PH\_SCHOL.do : [https://github.com/DHSProgram/DHS-Indicators-Stata/tree/master/Chap02\\_PH](https://github.com/DHSProgram/DHS-Indicators-Stata/tree/master/Chap02_PH)

Would need to use the PR file and adjust your paths.

Please read the readme file on the main page of our GitHub site (<https://github.com/DHSProgram/DHS-Indicators-Stata>) and the main file for Chapter 2 before trying to run any code.

Thank you.

Best,

Shireen Assaf  
The DHS Program
